TAG Closed: 580°F/304°C	N/A	N/E	

Method:

Extinguishing Media: Water, carbon dioxide, dry chemical.

Fire Fighting Avoid extinguishing methods that generate dust clouds. Water streams can disperse dust into Instructions:

air, producing a fire hazard and possible explosion hazard. Fire-fighters should wear self-

contained breathing apparatus.

Unusual Hazards: Polymer dust is combustible. Polymer dust has the potential to ignite at temperatures above 480°C.

Avoid high temperatures and high static conditions.

Section 6 – Accidental Release Measures

Spill or Release Sweep up to avoid slipping hazard. Keep airborne particulates at a minimum when cleaning

Procedures up spills.

Section 7 – Handling and Storage

Handling Observe precautions found on the label. Wash face and hands thoroughly with soap and water after

handling and before eating, drinking or smoking. Avoid prolonged or repeated contact with skin. Avoid

contamination. Use only with adequate ventilation.

Storage Store in cool, dry place away from heat, sparks, flame and direct sunlight. Close container after each

use. Ground all metal containers when transferring. Use explosion-proof equipment

Store away from combustibles and incompatible materials.

Explosion Polymer dust is combustible. Polymer dust has the potential to ignite at temperatures above 480°C. Avoid high

temperatures and high static conditions..

Section 8 – Exposure Controls / Personal Protection

Engineering Controls

Hazard

Use good local exhaust at processing equipment, including buffers, sanders, grinders and polishers. High

temperature processing equipment should be well ventilated. All equipment must be grounded.

Temperatures above 480°C must be avoided. Provide ventilation if necessary to control exposure levels below airborne exposure limits.
